

Abdelrhman Ayman

Software Engineer

Profile

Final-year Information Systems student with a strong interest in web development. I've built several personal projects using React, NestJS, and SQL. I also took part in backend-focused student activities through MSP and Masa Center. I'm eager to apply my skills and grow within a real development team.

Education

Bachelor's at Information Systems Taibah Academy, Maadi

August 2022 - August 2026

Grade: 3.2

Information Systems studies with coursework in programming, databases, and system analysis.

Internships

Backend Developer Intern at Sindbad, Cairo ,Maadi

July 2025 - October 2025 • [🔗](#)

- Successfully implemented a unified email templating system, streamlining communication and reducing template duplication by 40%. Developed and integrated a Notification Module, enabling real-time user updates across different channels. Built AI-powered integration to enhance system features and improve automation within the platform. Refactored the order management flow, improving code readability, maintainability, and scalability. Contributed to building robust backend APIs with NestJS and Prisma, ensuring system reliability.

Projects

gamified-learning-platform-fullstack • [🔗](#) (NestJS, Next.js, PostgreSQL, Prisma, Tailwind CSS, GitHub OAuth, Nodemailer, Gemini AI) A gamified learning system with challenges, points, and leaderboard. Implemented authentication (JWT & GitHub OAuth), AI-powered chatbot, email notifications, and a responsive Next.js frontend with dashboards and admin panel.

E-Commerce App • [🔗](#)

Developed a backend for an e-commerce platform using NestJS and MongoDB, featuring JWT authentication, role-based access, and full CRUD for products and categories. Implemented password reset via email and modular API architecture. Tech Stack: NestJS, MongoDB, Mongoose, JWT, Nodemailer

University Activities • [🔗](#)

A backend application for managing university activities with role-based access, JWT authentication, email-based password reset, and Stripe payment integration. Built using Express.js, TypeScript, Prisma, and PostgreSQL. Tech Stack: Node.js, Express, TypeScript, PostgreSQL, Prisma, JWT, Stripe, Nodemailer

Cairo

Skills

TypeScript, JavaScript, C++:

Backend: Node.js, Express.js, NestJS, RESTful APIs

Frontend: React, TypeScript, JavaScript (ES6+), Bootstrap, Axios, React Router, HTML5, CSS3

Database & ORM: PostgreSQL, MongoDB, Prisma, Mongoose

Tools & DevOps: Git, GitHub, Postman, Cloudinary, Stripe, Vite

Problem Solving C++

Debugging & Code Optimization

Agile & Team Collaboration

Clean Code & Best Practices

Volunteering

Backend Development Volunteer at Microsoft Student Partners (MSP), Onlin

May 2024 - August 2024

- Learned backend development with Node.js, contributed to team projects using REST APIs and databases, and improved problem-solving and teamwork skills.

Java Development Volunteer at MASA Center – Taibah Academy, Cairo, Maadi

July 2022 - November 2025

- Learned Spring Framework, built small web projects in a team, and improved OOP and collaboration skills.
